

INSTRUCTION

SUMMER SCHOOL

The Board of Education may offer a regular summer school program each year to meet the needs of the students. The purpose of this summer school program is to provide summer opportunities for pupils at all levels to have remedial instruction, enrichment instruction, and/or special interest activities.

In the event that state funding of the summer school program is not forthcoming or promised by the State of Illinois, then the administration will make one of the following recommendations to the Board for their approval:

1. Utilize funds from the educational fund.
2. Cancel summer school except for those portions which are funded from other sources such as Title I federal funds.
3. Charge participants in the summer school program a tuition fee in an amount not to exceed the per capita cost of the operation the program. The amount of per pupil tuition shall be determined by the administration and approved by the Board. The Board may waive all or part of the tuition fee if it determines that the student's family is indigent or that the educational needs of the student require his or her attendance.
4. Levy a tax for summer school pursuant to referendum approval.

Transportation of students enrolled in the summer school program may be furnished by the District at no charge to the participants if funds are available after regular transportation costs are covered.

The Board may apply to the State Board of Education for grants to enable children who are in need of remedial education in order to qualify for academic advancement to attend summer school without having to pay tuition, fees or instructional material expenses. Any State funds so received shall be used solely for the purpose of employing certified personnel, transportation, textbooks and other instructional material for such students.
