

OPERATIONAL SERVICES

FACILITIES DEVELOPMENT - SUPERVISION OF CONSTRUCTION

The District's Architect shall be responsible for assuring that plans and specifications of construction are met in a satisfactory manner. He shall make periodic reports to the Board regarding progress or any problems that may have arisen.

The Superintendent and/or an appropriate member of his or her staff shall likewise monitor the progress and quality of the construction, and shall endeavor to resolve with the Architect any problems they have observed. They shall also make periodic reports to the Board.

The School District may employ the services of a construction management firm to manage school construction projects.
