

OPERATIONAL SERVICESFACILITIES DEVELOPMENT - SITE ACQUISITION AND DEVELOPMENT

The identification of potential school building sites shall be a component of the District's long-term facilities program. The Board will consider the acquisition of available sites in advance of actual need as a protection of its plan.

Every effort will be made to purchase sites by negotiation with a willing seller at a fair and reasonable price. If this effort fails, and the acquisition of a particular site is essential for school building purposes, the right of purchase through legal procedures may be exercised.

Adopted: March 10, 1983
Revised: June 10, 1999
